

Pallet Burner

Outdoor Wood Furnace

Reduce Waste, Recover Heat

- Eliminates expensive disposal costs of scrap wood.
- Efficient heat recovery from disposal of pallets, crating material, wood remnants or cord wood.
- Loads easily with a forklift or by hand.
- Provides high capacity water heating.
- Heats multiple buildings, kilns, greenhouses and swimming pools.
- Works well with existing heating systems.
- Can be located up to 500 feet from buildings.

Not for Residential Use in the U.S.
